

Working at Château Jemeppe

You will be coming to Château Jemeppe in order to work, and we can provide the space and facilities you require.

The centuries-old Donjon has three large workrooms, and there is a fourth large room in the adjacent farmstead. Each room offers a pleasant working location in terms of facilities, comfort and aesthetics. Naturally, Château Jemeppe also caters for informal meetings, which can be held in the castle salons and reception rooms. Château Jemeppe provides everything that is required in the modern working environment – and more.

Each room brings the history of the castle to life, as well as providing all the facilities required in the modern work environment: LCD video projection equipment, digital recording equipment, wireless Internet, PC/DVD with printer, a range of planning- and presentation materials, and, of course, 'traditional' stationery and writing materials.

Extras? Extra monitors, a smartboard or document camera, projection screens, videoconferencing equipment, PCs or cables: we can provide them straightaway.

Working at Château Jemeppe

The castle also has breakout rooms for more informal discussions, or you can use one of the salons if you prefer a more informal setting.

A separate Boardroom and a Business Corner, complete with PC, printer, fax machine and photocopier (including A3) complete the range of working space available at Château Jemeppe.

All rooms have inspiring views of the forests and rolling landscape of the Ardennes. Weather permitting, you can also use the 'Green Room' – an ideal setting for brainstorming sessions and teambuilding...
